RESOLUTION DEPLORING THE PASSING OF CHAIRMAN DOUGLASS

WHEREAS, W. B. (Babe) Douglass, Chairman of the Florida Railroad and Public Utilities Commission, who passed away at 5:45 P. M., Monday, August 4, 1947, had served for fifteen years as a member of said Commission and three times as its Chairman; and

WHEREAS, Chairman Douglass exerted a tremendous and beneficial influence on the Commission's activities during the tenure of his office; and

WHEREAS, he had suffered for several years with a heart ailment but, nevertheless, at the sacrifice of his own physical welfare, he remained loyally at his post of duty until the very end, holding a series of difficult and important hearings until late in the afternoon of the day of his death; and

WHEREAS, during the past few years when the public hearings of the Commission had increased to the point where those held in a single month equalled or exceeded those held in a year when he first took office, and when travel conditions were difficult and he was warned repeatedly to slow down and take care of himself, he, nevertheless, insisted upon carrying the government to the people by holding many hearings over the state for the convenience of the public appearing before the Commission; and

WHEREAS, Chairman Douglass was largely instrumental in developing and promoting a recently adopted progressive program, streamlining the work of the Commission and bringing to the people of this state a greatly improved regulatory agency; and

WHEREAS, "Babe", as he was affectionately known by his associates on the Commission and his host of friends throughout the state, was dearly beloved by those with whom he worked; and

WHEREAS, the wisdom, experience and friendship of Chairman Douglass will be long remembered and sorely missed by those who knew him best in his official capacity; and

WHEREAS, his associates and colleagues on the Commission desire to perpetuate an expression of their high regard for him as a fellow public servant, as a friend and as a man;

NOW, THEREFORE, BE IT RESOLVED by the Florida Railroad and Public Utilities Commissioners in regular meeting duly assembled that they do hereby deplore the passing of their friend and associate, and recognize that in the death of Chairman Douglass they have each sustained a great personal loss and the State has lost a real public servant.

BE IT FURTHER RESOLVED that said Commissioners do hereby express to the widow and family of Chairman Douglass their deep and sincere sympathy for the loss of their loved one.

BE IT FURTHER RESOLVED that this Resolution be spread upon the minutes of this Commission, and that a copy thereof be sent to the family of Chairman Douglass and to the press.

DATED at Tallahassee, Florida, this 7th day of August, A. D. 1947.

Florida's Railroad Commission

FLORIDA RAILROAD & PUBLIC UTILITIES COMMISSION

IT IS THE LEGISLATURE'S CREATURE

The Florida Railroad & Public Utilities Commission, formerly the Florida Railroad Commission, a creature of the Florida Legislature, has been continued for nearly half a century by the Legislature as its instrumentality to effectuate clearly defined legislative policies in regulating certain major public common carriers and utilities. The Legislature has kept the Commission close to the people by permitting the people to elect the members of the Commission. The Commission's long tenure evidences the fact that its existence is fully justified.

IT STANDS AS A BULWARK PROTECTING THE PEOPLE FROM UNREASONABLE RATES AND CHARGES

It is the bulwark of the people which prevents and restrains:

- (1) exorbitant and unreasonable charges by great enfranchised carriers and utilities,
- (2) abuses by these necessary private monopolies, and,
- (3) their unrestrained license.

It is the administrative body to which the poorest citizen in the State can appeal for relief from oppression by great carrier and utility corporations.

ITS ACCOMPLISHMENTS

Though its work is little publicized, the Commission has accomplished and is accomplishing much good for the benefit of the people of the State. It continually requires reduction of rates and charges in cases where it appears the same are justified. All complaints received by it of overcharges contrary to prescribed rates and tariffs, or of violations of the rules and regulations of the Commission relating to the operation of carriers and utilities under its jurisdiction, are promptly investigated. If refunds of overcharges are not made, or if violations of regulations are not corrected, the offending carrier or communication line is subject to having its certificate of public convenience and necessity revoked or be subjected to fine, after due notice and hearing. The Commission protects communities, farmers, growers and other shippers from the unreasonable abandonment or disruption of transportation facilities, depots and stations, and from discrimination, rebates and unfair utility practices. Its policies have insured sound transportation and communication systems in the State.

IT IS QUASI-JUDICIAL BODY AFFORDING "DUE PROCESS"

Unlike many other administrative boards which may take action without previous notice of hearing, the Commission gives any carrier or utility under its jurisdiction complained against, due notice and hearing. "Due process" is thus afforded the carrier or utility to appear by counsel and defend against the complaint and offer evidence in its own behalf. Full factual evidence is required to support the action of the Commission in every case, and persons aggrieved by any order of the Commission are afforded the opportunity to have such order reviewed by the Supreme Court of Florida.

IT HAS ADOPTED SOUND BUSINESS POLICIES NOT HARMFUL TO THE PROPER FUNCTIONING OF UTILITIES

The Commission has not put into effect unreasonable and drastic rules and policies. Such policies are not intended or required by the Railroad Commission laws. Rates, rules and requirements of the Commission have been made effective only after full and complete investigation, and then only when the evidence and the public good warranted them. Sound business judgment and the welfare of the people have been deciding factors in tipping the scales in all decisions of the Commission. The Legislature in the Railroad Commission laws has clearly indicated that the utilities under the Commission's jurisdiction should be permitted to earn reasonable returns on their investments and to make reasonable reserves for expansion and improvements, and the Commission has carefully followed the Legislature's mandates.

EXTENSION OF THE JURISDICTION OF THE COMMISSION

The long experience of the Commission fully equips it, and the machinery and procedures of the Commission are geared, to render the highest type of regulation in all public utility fields which may hereafter be made the subject of Commission regulation by the Legislature. Moreover, placing such regulation under the Commission would eliminate the necessity of creating additional boards with their duplicating expense or the adding of additional duties to existing boards which are already excessively burdened with official responsibilities and which have neither the time for the machinery for affording "due process."

If for example the administration of laws conserving petroleum and natural gas is vested in the Commission similarly as it is vested in the public service commission of Texas, Kansas and Oklahoma, each oil producer or owner of oil drilling privileges would have a quasi-judicial body to pass upon his rights and he would be afforded ample opportunity to appear and be represented by counsel and have a

comprehensive hearing at which all technical, scientific and legal matters affecting his case would be judicially considered by the Commission before orders affecting his property rights were entered.

The Commission's procedures assure the public of constant attention to rate structures of utilities under its jurisdiction including annual analysis of costs and earnings of such utilities, with emphasis placed upon giving the public rate reductions wherever conditions warrant.

During the 1947 legislative session a bill was presented and passed changing the name of The Florida Railroad Commission to the Florida Railroad and Public Utilities Commission but the responsibility of regulating such utilities as lights, water and gas were not placed under the jurisdiction of this commission.

MOTOR TRANSPORTATION DEPARTMENT

During the year 1947, on its own motion, the Commission held several hearings at various points in the State of Florida for the purpose of investigating the service rendered by the bus operating companies. As a result of these hearings the Commission found considerable complaint on the part of the general public as to the inadequacies and sanitary conditions of terminal facilities. The investigations by the Commission went into all phases of the service rendered by the operating companies and it was found, in a general way, there was a necessity for a safety and sanitary department to be set up by the Commission, whose duty it would be to make investigations into the safety and sanitary facilities of such operating companies. The Commission did, in the year 1947, set up a program in which its field force is required, periodically, to make checks of the rest room and waiting room facilities of all terminals of the operating companies. As a result of these checks the sanitary facilities and general service has been greatly improved. The Commission in the next session of the legislature will propose the enactment of specific sanitary laws applicable to transportation companies, of which there is an absence in our present laws. The Commission feels that the public interest is too greatly effected, and that it is one of its public functions to see that the public health is better protected, and that a more sanitary condition should exist in these facilities than in the past years.

In addition to the foregoing, the Commission is at the present time setting up a safety program applicable to all operating companies under its jurisdiction. The purpose of this safety program will be to work in cooperation with other state safety organizations, as well as the safety organizations of all operating companies, in an effort to bring about a more "safety conscious" transportation industry. The Commission is hopeful of obtaining ample funds for the perfection of its safety and sanitary program, and the employment of technically trained personnel to conduct its efforts in these new fields of endeavor.

During the calendar year 1947 the Commission had an average of 14 inspectors whose duties included the enforcement of provisions of the Florida Motor Transportation Act. During that period the inspectors made:

Number of Arrests	342
Convictions	302
Cases Dismissed	14
Cases Pending	26
Number Investigations	8,350
Number Road Inspections	16,250

The above information represents generally the activity of the field force of inspectors of the Commission whose duties require the general

policing of motor truck transportation over the highways of the State of Florida of all motor vehicles operating under the jurisdiction of the Commission and in addition the policing and inspection of private carriers not under the jurisdiction of this Commission for the determination of whether or not such private carriers were engaging in the transportation for hire of commodities not exempt under the provisions of the Motor Transportation Act.

The field inspectors of the Commission, by virtue of the highly specialized nature of their work are required to be informed as to all laws, rules and regulations both of the Florida Motor Transportation Laws, and the Federal Motor Carrier Act so that they may efficiently and expeditiously handle all matters pertaining to transportation, both interstate and intrastate. They are called upon almost daily to investigate complaints made by shippers relative to rates, fares, charges and services of motor transportation companies. Almost daily the Commission receives complaints originating either from the shipping public or from the carriers and these complaints are transmitted to the inspector in the territory involved directing that he make a complete investigation and submit same to the Commission with his recommendation.

The inspectors are required to make road inspections of all carriers under the Commission's jurisdiction for the purpose of ascertaining whether or not the proper mileage tax is being reported to the Comptroller's office. From such reports and activity on the part of the field force a considerable amount of revenue has been collected by the auditors of the Comptroller's office in checking against carriers' monthly reports.

At the time of this report there are registered with this Commission—as is shown in the breakdown of carriers below, 1,424 carriers operating approximately 10,114 units of equipment which require regular policing as to compliance with the general rules and regulations applicable to their operation, safety, hours of service of employees and the general service rendered to the traveling and shipping public.

The Comptroller's office reports to the Commission that during the year 1942 there was a gross collection of mileage tax from carriers of approximately \$484,000.00; during 1943 a gross collection of \$650,000.00; during 1944 a gross collection of \$675,396.05; during 1945 a gross collection of \$626,309.01; during 1946 a gross collection of \$560,891.79; and during the year 1947 a gross collection of \$582,172.58.

The 1945 Legislature amended Section 323.05 of Chapter 22842 so as to allow taxicab operators to purchase Master Permits at a cost of \$25.00 a year and identification stickers for cabs operated at an annual cost of \$5.00 each, these flat charges being in lieu of mileage tax. The Commission collected approximately \$21,500.00 from these operators in 1945 and \$45,176.60 in 1946, and for the year 1947 only \$36,179.40 was collected.

Of the above number of carriers operating in the State of Florida there are 403 carriers operating approximately 4,795 units of equipment that are enjoying reciprocity as between the several states; that is to say, an agreement has been made between Florida and 34 states whereby carriers domiciled in the reciprocal states may operate in purely interstate commerce (contingent, of course, upon authority granted by the Interstate Commerce Commission into the State of Florida) without the payment of mileage tax. Such carriers operating under reciprocal agreements, however, must apply to the Florida Commission for Certificates of Registration, presenting proof of authority from the Interstate Commerce Commission to engage in interstate commerce in Florida. Such carriers are required to file insurance for the protection of the general public and they must also comply with police regulations of the Florida Motor Transportation Act.

The State of Florida is recognized by all other states as having the best regulated form of motor transportation in the United States and this could have been accomplished only by the effective work of an experienced field organization.

Report of Rate Expert

INFORMAL TRANSPORTATION CASES

By I. T. WILLIAMS, Rate Expert

There is a special procedure before this Commission under which rate cases can be tried without the formality of witnesses having to appear and give testimony in person. Shortened procedure is employed in adjustments where all interest parties are fully advised and extended an opportunity to participate and present their views.

Generally such adjustments are the result of carrier's desire to meet competitive rates and charges of other forms of transportation, and to also establish rates that will move the traffic. Our purpose in such a method of handling is to save time and money for all interested parties, including the State of Florida, and to effect a more prompt determination of issues. Informal cases for the year 1947 were as follows:

RAILROAD: PASSENGER, FREIGHT, EXPRESS
